

Custom Software Development for Education Manufacturing Firm

PROJECT DETAILS

 Custom Software Development

 Oct 2021 - Ongoing

 \$10,000 to \$49,999

"Dan was on top of the project the entire time."

PROJECT FEEDBACK

Digital Art Flow's efforts have been met with positive acclaim. The team is professional, knowledgeable, and effective.

PROJECT SUMMARY

Digital Art Flow was hired to design and develop a 3D room planning tool for use in learning spaces.

The Client

Please describe your company and your position there.

I work in the education manufacturing industry but my role is to support schools with their learning environments. We help to redesign, refurbish or remodel existing spaces.

The Challenge

For what projects/services did your company hire Digital Artflow, and what were your goals?

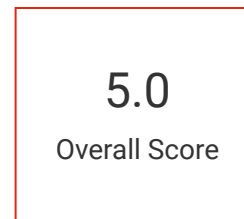

To create and implement a 3D room planning tool that enables users to create their learning spaces with Grasnells kit options.

CLIENT RATING

Quality: 4.5

Schedule: 5.0

Cost: 5.0

Would Refer: 5.0

The Approach

How did you select this vendor and what were the deciding factors?

Gratnells Product Designer worked with Digital Art Flow in the past and was keen to continue the working relationship.

Describe the scope of work in detail, including the project steps, key deliverables, and technologies used.

To create basic 3d room planner tool To incorporate existing Gratnells products as sketchUp files into the software

How many people from the vendor's team worked with you, and what were their positions?

1- Dan Stefan

The Outcome

Can you share any measurable outcomes of the project or general feedback about the deliverables?

Initial tool was available within time frame and worked really well. Since then, we have added several additional functionalities to the software package, each of which came with their own timeframe to deliver.

Describe their project management style, including communication tools and timeliness.

Very impressed with the instant communication that came from emails and calls. Dan was on top of the project the entire time.

What did you find most impressive or unique about this company?

Dan's communication style made it easier for me to understand things I had not known before about the back end of the software. He was very approachable throughout the entire project and continues to support me when I need it.

Are there any areas for improvement or something they could have done differently?

N/A
